

Everything you need for PIN-based transactions

Debit, electronic benefits transfer (EBT), and other PIN-based transactions continue to increase at the POS. To handle these transactions quickly and efficiently, you need a better way for customers to enter their PINs reliably and securely. The NURIT 222 is a lightweight, highly secure PIN pad with an ergonomic design that fits comfortably in the palm of your hand.

The NURIT 222 PIN pad attaches to virtually any payment terminal or electronic cash register (ECR). You can hand it to customers to quickly and privately enter their PINs, with the help of large keys and clear customer prompts on the easy-to-read graphical LCD display. Rugged and shock resistant, this field-proven device stands up to the most demanding conditions.

Your customers will especially appreciate the high degree of security built into the NURIT 222 PIN pad. The device is tamper resistant, tamper-evident, and tamper-responsive to protect against fraud and other abuse. In addition, it provides advanced encryption of all data and fully complies with PED standards for secure PIN entry devices. If you're looking for a way to increase your share of cost-efficient PIN-based transactions, let the NURIT 222 give you a hand.

BENEFITS AT A GLANCE

- Streamlines handling of PIN-based transactions—keeps lines moving
- Works with almost any payment device or ECR
- Easy for customers to hold and use
- Ensures security and privacy

NURIT 222

Handy for PINs

Features & Benefits

Perfect Fit

- Fits into almost any existing payment environment, connecting with VeriFone devices, ECRs, and other payment devices
- Is lightweight and easy for customers to hold while entering their PINs
- Complements payment terminals when used in countertop configuration
- Provides helpful customer prompts in multiple languages on large, easy-to-read graphical LCD display
- Offers large, ergonomic 15-key keypad to minimize mistakes and speed transactions

PIN Protection

- Protects against fraud schemes and physical security breaches using sophisticated tamper-resistant, tamper-evident, and tamper-responsive features
- Encrypts PINs and other sensitive data before transmission
- PED approved for secure PIN entry

The NURIT 222 PIN pad provides an economical handover or countertop solution for fast, efficient PIN-based transactions.

The NURIT 222 is a perfect complement for any payment device or ECR, including the NURIT 8320.
